Terminus

A developer-first Marp theme

Freelance Fullstack · v1.0

What's included

- **5 slide classes :** `cover`, `section`, `terminal`, `light`, `split`
- Syntax highlighting styles optimized for code-heavy decks
- JetBrains Mono + Inter font pairing
- GitHub Dark color palette with light variant
- Custom callouts, tables, image helpers

Code blocks look great

Install the theme in VS Code:

```
# 1. Download terminus.css
# 2. Add to your VS Code settings.json
"markdown.marp.themes": ["./presentation/custom-theme/terminus.css"]
```

Then activate it in your front-matter:

```
---
marp: true
theme: terminus
---
```

Tables are readable

FEATURE	FREE THEMES	TERMINUS
Dark mode	✓	✓
Light variant	✗	✓
Dev color palette	~	✓
Monospace UI	✗	✓
Split layout	✗	✓
Callout boxes	✗	✓

$ deploy --production

All systems operational

> `build` passed in 42s
> `tests` 148/148 OK
> `lighthouse` score: 98/100
> Deployed to https://yourapp.io

Chapter 2

Architecture & Design

Two-column layout

Left column content here.
Use it for code snippets,
bullet points, or text.

Right column content.
Perfect for diagrams,
screenshots, or contrasting
information.

Light variant

Same theme, light background.
Great for slides with screenshots
or when projecting in bright rooms.

```python
def greet(name: str) -> str:
    return f"Hello, {name}!"
```

Thanks
